Summary

Self motivated Software QA Engineer of 4+ years bringing analytical mindset, understanding of programming concepts and languages, continued learning, and strong communication skills to any team. Interested in bringing a quality-first mindset and best practices to product development.

Work Experience

BeFunky — Remote
Senior QA Engineer — Dec 2020 – Present
- Follow features and bug fixes through the software development cycle for weekly web releases.
- Cross Device test packaged app for release in AppStore and PlayStore.
- Collaborate with Product and Dev teams to define scope and ensure expectations are met and tracked.
- Review code changes to aid in building test scope by pinpointing affected areas of product.
- Communicate with the support team and users when needed to reliably replicate reported issues.
- Observe trends and troubleshoot issues using Mixpanel, Sentry, and GA4.
- Engage with the entire team in brainstorming and contributing to product vision and growth.
- Monitor existing Checkly and WebDriverIO tests; collaborate with devs to update tests when needed.

Bigtincan — Remote
QA Engineer — Dec 2019 – Dec 2020
- Ensured webApp passed local build and deployment to staging servers.
- Ran manual regression testing on web app, crm integration, and mail client add-ins.
- Pulled custom data reports in Django Shell and automated when possible.
- Worked closely with support and dev teams to trouble-shoot, document, and resolve bugs.
- Contributed to exploratory testing campaign comparing E2E automation test frameworks.

Nielsen Brother Inc — Sedro-Woolley, WA
Shop Tech — April 2014 – Dec 2017
- Maintained mechanic shop environment.
- Assisted in maintenance and repair of gas, diesel, and hydraulic equipment.
- Consolidated multiple loose roles into one.
